

Good morning committee members,

My name is Marilina Imperati and I live in North Haven.

I oppose Bill HB5429 as it will turn our local transit areas into small New England skyscraper cities. I'm this Bill it seems our local governments and planning and zoning committees are totally excluded. We the people elect these board members and have a in town relationships with them and can speak our grievances to them directly. Creating more unelected state committees to run towns on a local level will cause more backlogs and create more animosity toward our government.

Please vote no on this bill and keep our planning and zoning local

Thank you for your time
